Jarosław **Krzemiński**

Seasoned Java Architect and Technical Leader with 9+ years of progressive experience building enterprise-grade software solutions across fintech, e-commerce, and cryptocurrency sectors. Proven track record of architecting mission-critical platforms using DDD and microservices architecture while leading high-performing development teams. Successfully delivered electronic signature solutions for enterprise clients, cryptocurrency exchange systems, and e-commerce platforms. Combines technical excellence with team leadership capabilities, having mentored developers, established architectural best practices, and driven technical innovation. Skilled in transforming legacy systems and bringing products from concept to market readiness.
